

Revision Exercise

by Mark Gillan

Revision

- Read through the notes for “Internet Search Strategy”
- Review notes for searching online, internet and world wide web along with search engines
- Consider classroom discussions surrounding online searching
- The answers are in the notes but DO NOT copy and paste, please use your own words to demonstrate understanding
- Ensure answers are typed into a Microsoft Word document and saved as per instructions

EXERCISE – SEARCH REVISION

Type out responses to the following:

- What is a meta search engine?
- What is a directory listing and how does this differ to search engines?
- Name 5 different search engines other than Google, including 2 meta search engines
- Why might you use more than one search engine with the same criteria?
- Give 3 examples of Boolean advanced search technique.
- Provide examples of Boolean operators and their use.
- What other advanced tools are available with some search engines?

Save the file to coursework naming it: searchrevision
