

## General Data Protection Regulation Exercise

Create a presentation to include (discuss with a small group within the class):

1. What is General Data Protection Regulation (GPDR)?
2. When it was implemented?
3. What are the principles of GPDR with regards to personal data?
4. What effect will this have on 'cloud computing'?
5. Outline the similarities with the existing UK Data Protection Act 1998 (DPA), and describes some of the new and different requirements?
6. Will the UK leaving the EU have any bearing on GPDR implementation?

The presentation should have no more than 12 slides (if using PowerPoint).
