

EXERCISE: THE HUMAN BRAIN

Lecturer: Mark Gillan

EXERCISE: THE HUMAN BRAIN

- What is the brain and what does it control for human beings?
- How does the brain interact with the rest of the human body? What communication path does it take?
- What is the Cerebrum?
- What is the Cerebellum?
- Is there anything else you think is important to the workings of the human brain?
- Place your research into a PowerPoint presentation and save the file as: brain
- Place the file into your Coursework folder inside your main folder share on One Drive.
