

TRAINING AI OTHER PROJECT IDEAS FOR YOU

Lecturer: Mark Gillan

SOME MORE IDEAS

- Students should develop their skills and knowledge by solving various problems across **familiar** and **unfamiliar** contexts.
- For example, learners could choose from the list that follows or indeed add anything else upon discussion with lecturer.

MORE IDEAS

Train an image recognition model to differentiate between three objects, for example:

- Types of animal
- Types of fruit

Train an audio recognition model to differentiate between three sounds, for example:

- Voices
- Emotions

Train a pose recognition model to differentiate between three poses, for example:

- Different positions with hands and / or legs and / or whole body and / or head
- Yoga or meditation poses

Train a predictive model to predict missing data in a CSV file, for example:

- Illness based on symptoms
- Salary based on career details
