

EXERCISE — CODES OF PRACTICE

Lecturer: Mark Gillan

CODES OF PRACTICE - PROFESSIONALISM

- Many professionals who deal with sensitive information as part of their jobs have long established codes of practice
- Sometimes called Code of Conduct
- Most well-known of these would be for medical doctors or lawyers or teachers
- **Cyber security professionals** have access to sensitive data and private information. Therefore, should work under similar moral and ethical standards
- Relate to Cybersecurity (Professional Bodies)

CODES OF PRACTICE

Provide examples of TWO codes of conduct.

Reference and provide hyperlinks to the information

Ensure your report is in your own words, quotes can be used for discussion around the topic but plenty of your own words as well and ... Reference everything!

Remember Plagiarism Policy of the College.

As an introduction to your project file for the TWO codes of conduct, explain the importance of having a cyber security professional code of practice

Extensive report, detailing the importance of the code of practice / standards, clearly state with explanation as to the benefits within the workplace

Maybe ascertain from workplaces and individuals as to the benefits of a professional body membership code of practice for individuals and businesses

Extensively detail your own words, referencing any quotes that support your writing
