

Mobile Technology: Web Page Creation

Exercise 2: Accessibility

Accessibility tasks and topics

TASKS:

- › Research and provide evidence of knowledge using a Microsoft PowerPoint presentation
- › Consider the topics, specifically refer to valid sources (for example, charitable organisations with legal advice)
- › What are the needs of people with impairments and what should be done with web design to address the issues people face?

TOPICS:

- › Clear, common fonts, acceptable font sizes
- › Alternative text for images
- › Colour schemes for those with visual impairments
- › Multimedia use and accessibility
- › Layout and priorities

COMPLETION OF THE EXERCISE

Have you fully considered all of the following, plus more?

Font size, type, style

Colours

Disabilities and impairments

Images, text, video, audio

Input fields, buttons, positioning of elements

Layout, scrolling, touch screen gestures

Legislation

Non-compliance

The power of the Web is in its universality.
Access by everyone regardless of disability is an essential aspect.

Tim Berners-Lee, Inventor of the World Wide Web
