

Mobile Technology: Web Page Creation

Exercise 3:
Current Legislation and Usability

Legislation / Usability tasks and topics

TASKS:

- › Research all topics and provide evidence of knowledge using a Microsoft PowerPoint presentation
- › At least one slide per topic is required
- › Explain all aspects of each topic, for example, file types needs to cover all currently in use as well as those you might not want to use along with reasons
- › Some of the topics inter-relate and can be combined but do remember to extensively research

TOPICS:

- › Accessibility
- › Copyright Issues
- › Standards
- › Contemporary File Types for web-based media elements
- › File Compression
- › Typical Uses of different File Types
- › Interoperability
- › Plug-in use and requirements

COMPLETION OF THE EXERCISE

Have you fully considered all of the following, plus more?

Copyright issues as to the law and how it can cause difficulties if ignored or laws are flaunted

File types relating to images, video, audio and web pages themselves, including compression and plug-ins / operational requirements

Accessibility can be brief and refer to previous exercise to avoid duplication
