

Sneak Peek at Angles – ANSWERS

This document contains the angle measurements for the Worksheet related to Pie Chart Angles, just in case a protractor is not available to students and the angles can assist with commencement of calculations.

If a protractor is available, it is best to read the angles yourself.

You can use this to check after reading the angles.

Question 1 requires the student to calculate as to what angle should be applied to a new chart based upon data provided. If a protractor is not available, a rough diagram can be done with the angles marked as calculated.

The full answers should be then used to check. Use the answers after calculations are complete.

Question 2 provides a chart that requires the reading of angles.

Therefore, here is a note of the
