

Overtime Fractions Worksheet

This exercise will cover the following:

- Fractions
- Overtime

Exercise Name: Worksheet – Overtime Fractions

The exercise begins:

Question 1:

Jane normally works a **40 hour week**. She is contracted for 40 hours but can work overtime paid in addition.

Overtime is paid at **time and a third** for evenings and **time and a half** for Saturdays and **double time** for Sundays. Her basic rate of pay is **£15.60** per hour.

Calculate her gross pay in a week when she works 2 hours overtime each on Tuesday and Thursday evenings, 3 hours overtime Saturday and 4 hours overtime on Sunday.

ANSWER:

The exercise ends. Check your work.
